

Llenwi is an exciting Creu Conwy project that will be creating and installing destination signage that features large scale artwork across Conwy county. The project is led by local augmented reality artist, Livi Wilmore and traditional signwriter Tomos Jones - they will be collaborating and holding creative workshops so communities can inspire the artwork and final installations.

The areas that are the focus of the project are: Abergele, Colwyn Bay, Llandudno, Conwy and Llanrwst. As part of the research phase the artists are hoping to get to know each area in a slightly different way . . . that 's where you come in.

We need help gathering stories, sayings, phrases, memories, pictures, and anything else about your area. There is no restriction on what could be gathered, or how it is presented. Share your own stories (they could be funny, silly or sad), memories, sayings, or ask a friend/relative/neighbour /member of the community.

Town:

A Memory

Give us a memory of your time in the town! It could be a poignant memory from a first visit- Or something funny that your mate did last week!

Five Words

What five words or phrases spring to mind when you think of this town? This could be descriptive, a feeling, or even some local slang!

Symbols

What imagery comes to mind? It could be anywhere from some key monuments, architecture, local plants/ animals you see, to your childhood friends ' mums ' victoria sponge!

Anything Else?

Anything else about the town you ' d like to share? We ' re also looking for potential sites so let us know if you can think of any good blank wall spaces!

Run out of room? Please send anything else you ' d like to share to creu@conwy.gov.uk Subject Line: MEMORY SHARE

LLENWI

Mini Worlds

As part of our project we will be experimenting with creating "mini 3D worlds" out of your panorama photos. We want to see "your world", maybe a room you feel at peace in, or a spot on your favourite bench- your own personal place of peace within Conwy county.

Scan here to see an example of this 3D AR world

How?

If you have a smartphone, you will be able to capture a panoramic photo inside your camera app, by pressing capture on "pano" mode and slowly moving your camera right to scan the desired area. If you have a traditional camera, you can take two or more photos that line up together, and then search for "online panorama stitcher" - there are many viable options!

Then?

Email your photo over to us at creu@conwy.gov.uk with the subject line: PANO with a line on the context of your panorama (if you'd like to share!)

(By sharing the photo you are agreeing that we can use your image in our AR experience- you will remain anonymous- we will also inform you of any project updates)

Workshops!

(And keep in touch!)

We will also be hosting workshops on poetry and digital modelling throughout May. More info at

t.ly/Liv2v

(Or at your local library)

Follow along the instagram pages below/ the link above to see how your ideas are used or sign up to be updated at the same above link

Hand this sheet back in at your local library or to who handed it out to you (You can also take me home and email in your responses!)

Hero Object!

LLENWI

What is it?

A "hero object" is an object at the centre of a great (or mundane) story, memory or adventure. This could be a necklace you found at the beach, a sweaty plastic toy your little cousin passed you! Something that reminds you of your chosen Conwy County town!

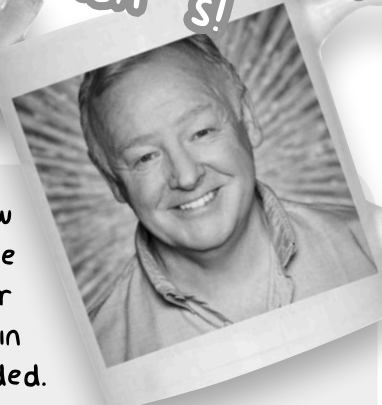

My Hero Object Is:

Tell us about your object and where it is linked to

Chip cone
In the rain!

Mug at your
nan's!

Draw or write about your hero object in the space provided.

If you'd like to experiment further with new ways to showcase your object, here's some "further learning" - We'd love to see what you create if you have a play around with any of these tools!

3D modelling!

Try searching online for SCULPT GL and WOMP 3D for some great free web-based (so no download needed) programmes for experimenting with building digital objects

Photogrammetry!

Photogrammetry is a way of creating 3D models out of multiple photos of an object/ person/ environment. It is a great way of archiving a moment in time! I recommend looking into the free smartphone apps REALITY SCAN or POLYCAM to get started

Then?

If you've created a hero object elsewhere, send an image to creu@conwy.gov.uk with the subject line: HERO OBJECT

(By sharing you are agreeing that we can use your image in our AR experience- you will remain anonymous - we will also inform you of any project updates)
